Extrusion, injection and blow moulding

# Decelith® rigid PVC compounds

Our rigid PVC compounds offer a wide variety of properties excellent for extrusion, injection moulding and other processing technologies. Their versatility allows the use in all verticals - from construction to electrics over to healthcare and automotive.

In doing so the respective properties are influenced by the recipe components. Attributes such as weather resistance, mechanics, colour, gloss, and many others can be precisely adjusted based on the usage and requirements. A careful selection of resources and a certified production process are key to a consistently high quality.

## Properties

- densities between 1.30 and 1.70 g/cm<sup>3</sup>
- special UV coating
- impact resistant
- filled or unfilled
- clear, transparent, natural, and coloured
